## About me

---

Fresh graduate of Telkom University's Computer Science program seeking career opportunities in the IT field, particularly in UI/UX and Frontend development. During my studies, I was involved in various activities, including serving as a member of the Permib student organization in the Perfect sponsorship department and as member of the Permib executive board in the Permib external affairs department. I also have work experience as a freelancer in online research on Upwork, an internship at Rantai Khatulistiwa Law Firm as a Fullstack Web Developer focused on UI/UX design and frontend development for the Rantai Khatulistiwa Law Firm website, as well as my independent project in developing a web-based application for Sundanese script learning. With a strong background in technology and design, along with practical experience in full-stack web development (frontend development and UI/UX), I am confident that I can make a meaningful contribution to the Company.
